

APPLE PRINTS

1. Slice an apple in half and dip it in poster paint or colored ink. Make sure to place newspaper under the paint paper.
2. Press the apple onto white paper, making a design of different colors. You should be able to see the inner lines of the apple.
3. You can make cards, gift-wrap, decorate reports or book covers, etc.

(Note: This can be done with other fruits and vegetables, too, such as oranges, red cabbage, artichokes, mushrooms, green peppers, string beans, potato.)
